REGARDING: 98N-1230, 96P-0418, 97P-0197

To Whom it May Concern:

I am writing with concern in regard to the plight and mistreatment of poultry in the egg industry.

With respect for the life of our fellow creatures, and also in conjunction with human health factors, I strongly urge the FDA to act on the April 1998 petition that requested a ban on forced molting. Aside from the cruelty factor and that it (forced molting) is not natural, studies have indicated that this practice has promoted disease as it destroys the animals' immune system. This, in turn, is the major cause of

infectious diseases in hens, eggs, and even....

The consumers of these eggs, which is US?

Bacteria warning labels on egg cartons and regulations stipulating egg refrigeration temperatures are not enough?

- The cruelty and contamination are linked without a doubt. These situations will be occurring at the other "corporate" livestock facilities too, because anywhere where you have mass production being the main focus (for the \$), you do not have the care and carefulness that assure proper procedures and guidelines which result in a healthy product. <sup>(Corporations are)</sup> Larger IS NOT better. Larger is ruthless and cold-hearted, cutting corners when and where they can. All that matters is the almighty \$. The small farmer cares for and nurtures his animals and takes pride in the compliments he receives about his milk, eggs, and meat products. \* These are the products with little or usually NO additives. Therefore, fewer health problems for the consumers...

Please support the ban on forced molting without delay... for all of us. This would be a step in the right direction.

Thank You.
